

```
67 // Continues from Figure 5.4.
68 // Instead of using the covariances in covarianceMap, we can get more
69 // consistent covariances using Laplace's approximation.
70
71 // Build marginals from the original graph and the interpolated means.
72 Marginals marginals(graphOriginal, resultAll);
73
74 // Extrapolate interpolated covariance for, e.g., Pose 1.
75 Matrix cov_p1 = marginals.marginalCovariance(p1);
```
